9. CONTEST & PROBLEM INTELLIGENCE — WEEKLY CONTEST 518

Official performance telemetry captured during the LeetCode contest window (06.09.2026). A total of **0 students participated** (0.0% college participation rate), achieving an average rating benchmark of **1500.8**.

Problem Tag	Difficulty Level	Total College Solves	Participant Solve Rate %	Target Learning Outcome
Q1	Easy	0	0.0%	Array & String manipulation, conditional simulation, basic hash maps.
Q2	Medium	0	0.0%	Prefix sums, two-pointer search, sliding window, binary search.
Q3	Medium / Hard	0	0.0%	Tree traversal, graph shortest paths, dynamic programming states.
Q4	Hard	0	0.0%	Advanced segment trees, bitmask DP, hard topological graph problems.

9. Contest Q1–Q4 Problem Intelligence

Contest: Weekly Contest 518 Date: 10-09-2026

Q1-Q4 problem-level data is not available for this contest. Official problem data will be populated once participant results are synced.

10. Weekly Historical Trend

Historical trend data is not available. Data will populate as weekly snapshots accumulate.

12. Recommendations & Action Plan

The following recommendations are generated automatically from the validated analytics dataset. Each item is grounded in actual measured metrics — no generic filler.

HIGH PRIORITY

- **[Student Engagement]** Intervention required for 11 inactive students (2.1% of cohort). These students have shown zero activity in recent weeks. *(Metric: 11 students / 2.1% inactive rate)*
- **[Academic Risk]** 119 students are classified AT_RISK based on declining activity, stagnant solved count, and/or poor contest engagement. *(Metric: 119 at-risk students)*

MEDIUM PRIORITY

- **[Department Focus]** CSE department requires attention — lowest solved count (2). Faculty coordinator should review student engagement. *(Metric: 2 total solved)*
- **[Department Focus]** IT department requires attention — lowest solved count (11,159). Faculty coordinator should review student engagement. *(Metric: 11,159 total solved)*
- **[Contest Participation]** CSE(CS): Only 0% contest participation. Recommend mandatory contest engagement and pre-contest preparation sessions. *(Metric: 0% participation rate)*
- **[Contest Participation]** CSE(IOT): Only 0% contest participation. Recommend mandatory contest engagement and pre-contest preparation sessions. *(Metric: 0% participation rate)*
- **[Batch Development]** II batch has the lowest average solved count (27). Structured DSA bootcamp and beginner problem-set recommended. *(Metric: 27 avg solved)*

11. DATA AVAILABILITY & TELEMETRY INTEGRITY

Telemetry Status	Student Count	Percentage %	Operational Description
AVAILABLE	386	72.1%	Verified active profile with real-time synchronized problem and contest metrics.
PARTIAL	124	23.2%	Registered LeetCode handle with 0 verified solves or pending initial sync.
NOT_AVAILABLE	25	4.7%	Unlinked profile or invalid username requiring department coordinator action.

12. METHODOLOGY & REPORTING RULES

- 1. Data Ingestion:** Platform statistics are fetched directly via official LeetCode GraphQL / API adapters and validated against institutional student enrollment records.

2. Delta Progression: Weekly problem growth represents net verified solves between consecutive weekly snapshot cycles (W-2 -> W-1 -> Current).

3. Zero-Value Integrity: Missing or unverified profiles are strictly flagged as N/A or NOT_AVAILABLE; no missing data is converted to zero.

4. Risk Scoring Engine: Calculates multidimensional engagement risk (0–100) combining solve velocity, active days, and streak continuity.
